

The challenge

The client required a large shop floor levelling on a tight time frame. The 6,000m² floor ranged from 18-35mm in depth.

The solution

Gyvlon **Excelio** bonded at 18-35mm was the product selected due to the speed, strength and cost savings.

Results

The large floor was poured over 4 days with trades light foot traffic within 24 hrs and full site traffic within 48 hrs ensuring the tight frame was achieved.

By replacing a bagged self-leveller with Readymix Gyvlon Excelio the customer saved time and money.
